## SKILLS

---

### LANGUAGES

HTML, CSS, JAVASCRIPT, TYPESCRIPT

### TOOLS-FRAMEWORK

REACT JS , ANGULAR, NODE JS, BOOTSTRAP, TAILWIND, FIREBASE

## PROJECTS

---

**Netflix clone.** A Netflix clone built using React Js, Tailwind CSS, and Firebase. This project includes a server-side backend using Firebase, with user data stored in Cloud Firestore. Tech Stack: React Js, Tailwind, Firebase, Github. ([source code is available here](#))

**Type-verse.** This application allows users to check their typing speed by providing random sentences for them to type. Tech Stack: React Js, Tailwind, Github Pages. ([platform is available here](#))

**User Authentication form.** The User Form application is designed to provide a user registration and login system. It allows users to sign up with their information and subsequently log in to access the application's features. The backend is powered by JSON Server, providing a RESTful API for user management, while the frontend is built using Angular. Tech Stack: Typescript, Angular, Node js, primeng UI library ([source code is available here](#))

## EXPERIENCE

---

### Frontend dev

feb 2024 - present

Swami Infotech

Surat, Gujarat

- As a current Frontend Development Intern, I am actively engaged in refining my expertise within the Angular framework. Through ongoing projects and hands-on experience, I am continuously crafting visually captivating frontend elements.
- With each task undertaken, I am further enhancing my proficiency and contributing to impactful projects that contribute to my professional growth in the field.
